Dear Hiring Manager,

**Hiring Manager**  
ABBY  
Bangalore, India

I'm writing to express my interest in the **Associate Software Engineer** role at ABBY. As a backend-focused full-stack developer with a strong foundation in **Node.js**, **Express**, **MongoDB**, and **FastAPI**, I'm passionate about designing scalable systems and delivering clean, maintainable code. I've built real-world applications like **RailAlert**, a railway PNR tracking system with user subscription and alert features, and I'm currently working on **RouteWise**, a travel optimization platform for multi-modal routes. I'm also comfortable with frontend tools like **React** and **Tailwind**, which helps me build end-to-end solutions.

What excites me most about ABBY is your commitment to engineering excellence and innovation. I admire your customer-first mindset and your focus on team collaboration, code quality, and continuous improvement—all of which align with my values as a developer.

I've attached my resume and GitHub for your reference. I'd be thrilled to bring my skills to ABBY and contribute to impactful, high-quality products.

Best regards,  
**Prateek Shukla**
